

Dragon Seal WP

PREVENTION. PROTECTION. PEACE OF MIND.

indicative seal

Strong indicative security seal with metal locking device

- 1 The Dragon Seal WP is etched with permanent laser marking. Laser marking offers high security because it cannot be removed and replaced.
 - 2 Ultrasonic welding technology is used to fasten caps to the seals. Ultrasonic welding creates a permanent bonding that is too strong to be cut or forced open without leaving clear evidence of tampering.
 - 3 Metal clip locking provides better locking and greater pull strength to the long, thick strap.
 - 4 Colour coding is an option using combinations of white-based seals and multi-coloured caps.
- The ribbed pattern on the seal cap and locking body is an extra security feature that provides clear evidence if the seal has been cut or tampered with.

Specifications

Product	Material	Locking Length	Strap Dimensions	Pull Strength	Marking Area	Marking Digits
Dragon Seal WP (25cm / 35cm / 40cm / 50cm)	Polypropylene Nylon (with Stainless Steel metal pin)	19 / 29 / 34 / 44 cm 19 / 29 / 34 / 44 cm	2.5 x 8.0 mm 2.5 x 8.0 mm	50 kg 60 kg	Flap: 1.8 x 4.5 cm Flap: 1.8 x 4.5 cm	Max 18 Max 18

The Dragon Seal WP is supplied in mats of ten.

High Security Bag Seal

The Dragon Seal WP is designed for optimal tamper-evidence. The seal features an easy-to-apply metal locking device and large flap area, making this one of the most practical bag seals for high-security applications.

Standard marking includes serial number, customer name / logo. A variation of bar codes can also be marked with laser technology

The Dragon Seal WP can be used on any kind of sack or bag designed for high-value transportation. Widely used for airline cargo, bank and postal services roll-cages, clinical waste management, courier services, cash-in-transit, warehouses, tote-boxes and other applications requiring high pull strength.

Be assured of better security with our innovative use of materials and industrial design.
