

# Mini Fast Seal

PREVENTION. PROTECTION. PEACE OF MIND.

## indicative seal

### Versatile seal with metal locking

- 1 The Mini Fast Seals are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 2 Heat staking technology is used to permanently fix the cap to the Mini Fast Seal. Heat staking is too strong to be cut or forced open without leaving clear evidence of tampering.
- 3 Metal clip locking provides greater pull strength to the thin and flexible strap.
- 4 Durable Nylon securing strap gives the user a choice of strength to match different applications.
- 5 Color coding is made possible by having a variety of our standard color seals with white based caps.
- 6 The Mini Fast Seals are supplied in mats of ten for ease of handling and control.
- 7 A floating metal clip is securely shielded by a cap, providing great locking strength and security

<b>Colour Cap</b>	White only							

### Description

The Mini Fast Seal is a relatively strong seal. This is partly due to the metal locking mechanism, which secures the seal.

The Mini Fast Seals are made of Nylon Hi. The Mini Fast Seals are easy to use for all applications with small sealing facilities e.g. cassettes for ATM machines, money boxes and catering trolley.

Be assured of better security with our innovative use of materials and industrial design.
