

# SP MCL200

PREVENTION. PROTECTION. PEACE OF MIND.

## security seal

### Cost-effective cable locking seal

- 1 The exterior casing of the SP MCL200 seal is made of high-impact ABS plastic which provides a tough shell around the aluminium locking mechanism. The cover is available in various colours and is ultrasonically welded to the white base plate.
- 2 The design of the SP MCL200 seal is suited for colour coding and eases identification from a distance. The sizable surface area can be etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 3 One end of the non - preformed galvanized steel cable is permanently secured into the locking body.
- 4 The other end of the cable feeds into a one-way locking mechanism; providing fast and easy sealing.

### Specifications

Product	Material	Locking Length	Cable Diameter	Pull Strength	Marking Area	Marking Digits
SP MCL200	ABS moulded body, aluminium locking mechanism and non - preformed galvanized steel cable	180 mm	2.0 mm	200 kg	17 mm x 25 mm	10
Carton Quantity	Dimensions mm	Weight kg/carton	Volume m <sup>3</sup> /carton	Standard colours		
200	288 x 178 x 146	5	0.00748	Blue, White, Green, Orange, Red, Yellow with White base		

### The convenient cable seal

The SP MCL200 is a variable length cable seal providing security through its unique locking mechanism and cable design. The seal is secured as soon as the wire has passed through the one-way locking mechanism and pull tight to secure the application.

The SP MCL200 seals are widely used on trucks, tanker trucks, air cargo containers, shipping containers, rail cars, calibrators and valves.

Be assured of better security with our innovative use of materials and industrial design.
