

# Simulock

PREVENTION. PROTECTION. PEACE OF MIND.

## indicative seal

## Tamper evident ring seal

- 1 The Inspection Window is a unique feature developed to enable quick and easy visual checking of the locking mechanism. The locking mechanism on other seals cannot be inspected visually, making those seals less tamper evident.
- 2 The Inspection Window is ultrasonically welded to the seal. Ultrasonic welding is permanent and it is too strong to be cut or forced open without leaving clear evidence of tampering.
- 3 The Simulock is etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 4 The snapping point provides easy removal of the seal while security breaking lines prevent a broken seal from being glued or welded together without leaving evidence.
- 5 Simultaneous double locking mechanism makes tampering very difficult.

## Specifications

Product	Material			Locking Length	Strap Dimensions	Pull Strength	Marking Area	Marking Digits
Simulock	Polypropylene			18.5 mm	1.0 x 8.0 mm	25 kg	Strap: 5.0 x 14.0 cm	Max 15
INNER CARTON Quantity	Dimensions mm	Weight kg/carton	Volume m <sup>3</sup> /carton	OUTER CARTON Quantity	Dimensions mm	Weight kg/ carton	Volume m <sup>3</sup> /carton	
1,000	315 x 275 x 200	4.22	0.01733	5,000	1030 x 295 x 325	22.00	0.09875	
<b>Standard colours</b> yellow, blue, white, red & green								

## User-friendly Seal

The Simulock is easy to apply and easy to inspect. This seal optimizes security while saving valuable time and money. The unique features found on the Simulock make it much more than just another ring seal.

Standard markings on the Simulock seal include serial number, customer name/ logo. A variation of bar codes can also be marked with laser technology.

The Simulock is widely used for trucks and tankers, customs control, airline cargo, warehouses, roll cages, rail wagons, empty shipping containers etc.

**Be assured of better security with our innovative use of materials and industrial design.**
