

Triple Tight SP

PREVENTION. PROTECTION. PEACE OF MIND.

indicative seal

Triple locking seal

- 1 The staggered triple locking mechanism provides secured locking even if sudden assertive force is applied.
- 2 Ultrasonic welding technology is used to fasten caps to the seals. Ultrasonic welding is too strong to be cut or forced open without clear evidence of tampering.
- 3 Triple Tight Seals are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 4 The Inspection Window is a unique feature which enables quick and easy visual checking of the locking mechanism. Most other seals feature hidden locking mechanisms, making them less tamper evident because part of the seal cannot be visually inspected.
- 5 Tight grip on bags and other soft materials is possible with the minimal loop produced when the seal is tightened.
- 6 Finger grips at the end of the tail make the seal very easy to apply even in extreme temperatures.

Specifications

Product	Material	Locking Length	Strap Dimensions	Pull Strength	Marking Area	Marking Digits		
TTSP 5" 8" & 10"	Polypropylene with acetal insert	12.5 cm, 20 cm & 25 cm	2.0 x 4.0 mm	20 kg	Cap : 1.0 x 2.0 cm Flap : 0.7 x 2.2 cm	Max 8

Standard colours	TTS colours: yellow, blue, white, red & green TTSP colours: white & yellow with locking inserts in TTS colours							

The Standard / Special difference

There are two versions of the Triple Tight Seals - Standard (TTS) and Special (TTSP).

The strap on the Triple Tight Special is a mere 4 mm wide compared to the standard Triple Tight, which is 5 mm wide.

The Special version is equipped with an advanced floating locking mechanism that makes it more user-friendly and makes colour-coding an additional option.

Standard markings: serial number, customer name/ logo. A variety of bar codes can also be marked with laser technology.

Typical applications: banks and security companies, airlines, ground transportations, mail services, hospitals, casinos, hotels and tankers.

Be assured of better security with our innovative use of materials and industrial design.
