

# MF6mm

PREVENTION. PROTECTION. PEACE OF MIND.

## Container Security Bolt Lock

### Container Security Bolt Lock

The metallic pin and bush of the MF6mm is made of high-carbon steel which gives better strength and added security.

The barrel is made from high impact ABS which is moulded on to the high-carbon steel bush.

The barrel is etched with permanent laser marking for name, logo, sequential numbers and barcode. Laser marking offers the highest level of security as it cannot be removed and replaced.

The MF6mm seal is part of our container seal range. This bolt seal is just 6mm thick, which makes the seal very easy to remove with bolt cutters, especially when multiple seals need to be removed quickly.

### Specifications

<b>Material</b>	High-carbon steel pin & bush	<b>Max Marking Digits</b>	6
<b>Pin Length</b>	72mm	<b>Carton quantity</b>	200
<b>Bolt Diameter</b>	6mm	<b>Dimensions</b>	300 x 250 x 230mm
<b>Pull Strength</b>	500kg	<b>Weight kg/carton</b>	7.1kg
<b>Marking Area</b>	Barrel: 20 x 7mm	<b>Standard colours</b>	Blue

### Container Security Bolt Lock

The MF6mm locking mechanism (the clip), is embedded in a groove in the metal bush, making the seals stronger and more difficult to tamper.

Typical applications of the MF6mm includes shipping and intermodal containers. The MF6mm is also widely used for ground transportation.

Be assured of better security with our innovative use of materials and industrial design.
