

# Reusable Bag

PREVENTION. PROTECTION. PEACE OF MIND.

## labels, pouches & bags

## Reusable tamper evident Security Bags

- 1 The chamber is TE closed the zip bridge & slider are both totally enclosed within the chamber cover, this TE enclosure of 2 vital security elements of the bag is the unique feature of the Tebco chamber.
- 2 All rivets holding the chamber on to the bag fabric are totally enclosed within the bag when closed.
- 3 The zip chain is sewn into our bags with the reverse side out eliminate the bag being broken into via the zip chain & then re-meshed, showing no evidence of entry.
- 4 Our bags are externally sewn for temper evident security.
- 5 A clear window for sender/receiver information is only accessible from the inside of the bag. The window is made from clear vinyl and is heat welded on the bag with strong bonding.
- 6 The security seal can be laser marked with permanent sequential numbers.
- 7 The bag can be screen printed with company name or logo for easy identification.

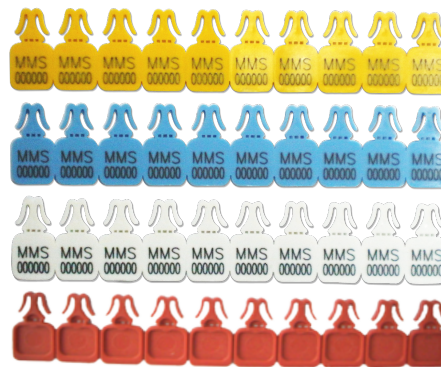

### Specifications

**Materials:** The standard bags are produced from PVC mesh - a tough, reinforced fabric which is both ripstop & fire retardant. PVC is a water repellent fabric & therefore the bag provides an adequate level of showerproof protection. The bags can also be made in other materials such as polyester, nylons such as Cordura, canvas, etc.

**Locking:** The seal of the bag is done by placing a security seal in the TE security chamber which close a zipper. The bag is considered opened.

**Standard colours:** Green, Blue, Red and plastolene as a semi-transparent fabric. Other colours are available on request. Customisation of size, colour and marking is possible.

**Applications:** Securing of confidential documents internally in companies – and between companies and third parties like law firm, accounting companies, trading partners and sister companies. Also to be used in the areas where securing or coin currency notes are necessary.

### Description

The reusable bag is specifically designed to secure, money, confidential documents and sensitive information. The security bags are locked with an individually marked security seal which ensures high tamper evidence.

Handles and customized identification can also be added to the bags.
